Interactive Personal Portfolio Website

Concept / Theme：
My midterm project is a personal portfolio website designed as a virtual creative workspace.
Instead of using a traditional portfolio layout, I want the homepage to look like a digital studio where different objects represent different parts of my work.
For example, a camera can lead to my video projects, a computer can show my web projects, and a sketchbook can show my design work.

I was inspired by interactive 3D portfolio websites that use a virtual room or workspace as the main interface.
I like how the environment itself becomes part of the navigation. Instead of only clicking traditional menu buttons, users can explore objects in the space to discover different projects.
For my website, I want to combine a 3D studio feeling with a simple and clean portfolio layout.

"

What I like about this style:
- 3D workspace / room environment
- objects used as navigation
- playful interaction
- strong personal identity
- simple but memorable layout

Skills I Still Need to Learn

To make the website feel more interactive and closer to a 3D portfolio, I may need to learn some additional techniques.

- CSS transitions
- CSS animations
- Simple JavaScript interactions
- Clickable objects
- Embedding 3D elements
- Basic Three.js
- Better responsive design

Skills I Have Learned

I will use the HTML and CSS skills we have already learned in class to build the basic structure and layout of my portfolio.

- Semantic HTML
- Images and links
- Navigation
- Flexbox
- CSS Grid
- position: relative
- position: absolute
- :hover
- CSS variables
- Margin and padding
- Width and height

HOME — 3D STUDIO

- Computer → Web Projects
- Camera → Video Projects
- Sketchbook → Design

Projects

- AI Object → AI / Animation

- About Me
- Contact

Email / Instagram

The homepage will use a 3D-style studio as the main visual area.
Different objects will act as navigation and lead users to different project categories.
The rest of the page will include an About section, selected projects, and contact information.
